Subject and Author Index to Volume 21

Abstracts, from American Society for Parenteral and Enteral Nutrition, 21st Clinical Congress of, S1 (Jan/Feb issue)
Acid maltase deficiency, muscle weakness and dysphagia in, 46
Acute pancreatitis, mild, early enteral vs. parenteral nutrition in, 14
Adipose cells, GLUT4 protein alterations in, insulin resistance and, 347
Adipose tissue, fatty acid profile in, before and after liver transplant, 302 (abstract)
Adolescents, Crohn's disease in, low- and high-fat peptide-based diets in, 304 (letter)
Albumin, serum, as survival predictor
 after cardiovascular surgery, 81
 after percutaneous endoscopic gastrostomy, 53 (editorial), 72
American Society for Parenteral and Enteral Nutrition, 21st Clinical Congress of, abstracts from, S1 (Jan/Feb issue)
Amino acid concentrations, plasma, in infants fed whey predominant vs. whey hydrolysate formula, 27
Amino acid metabolism, hepatic, during short-term TPN, 330
L-Arginine, L-citrulline production from, in elemental vs. complex diet, 316
Arginine supplementation, in enteral nutrition, nitric-oxide—producing tumors and, 215

Bacteria
 colonic, *in vitro* fermentation of high-amylose cornstarch, 290
 intestinal, in nutrient metabolism, 357
Benzodiazepine dependence, home TPN outcome and, 336
Bone marrow toxicity, of medium- vs. long-chain triglyceride emulsions, 343
Bone marrow transplantation, outpatient total parenteral nutrition vs. IV hydration after, 157
Burn injury, muscle protein metabolism in, insulin-like growth factor 1 and, 245
Butyrate, decreased in vivo crypt surface hyperproliferation and, 177 (erratum)

Cancer
 hepatic metastasis in, medium-chain triglyceride emulsion and, 220
 home TPN in, 339
 postoperative prostaglandin release in, fish oil structured lipid-based diet and, 266
Carbohydrate supplementation, in hepatic cirrhosis, energy metabolism and, 96
Cardiovascular surgery, outcome in, preoperative hypoalbuminemia and, 81
Catabolic rate, energy balance and, 324
Cathepsins, intestinal, as markers of mucosal barrier function, 104
Catheter infection
 in home parenteral nutrition, 117 (erratum)
 skin-site colonization by *M. furfur* and, 230
Celiac sprue, acid maltase deficiency in, muscle weakness and dysphagia in, 46
Central lines, skin-site colonization of, by *Malassezia furfur*, 230
Central venous access, via ovarian vein, 235
Children. *See also under* Infant; Neonates
 bedside placement of pH-guided transpyloric small bowel feeding tube in, 112
 modular nutrients in, 118 (letter)
Cholecystokinin, for prevention of TPN-associated cholestasis, 100
Cholera toxin, epidermal growth factor up-regulation of sodium-glucose cotransport and, 185
Cholestasis, TPN-associated, cholecystokinin prophylaxis for, 100
Cirrhosis, hepatic, energy metabolism in, extra-carbohydrate supplementation and, 96
L-Citrulline, from L-arginine, in elemental vs. complex diet, 316
Clinical Nutrition, joint venture with *JPEN*, 309 (editorial), 357
Clinical practice guidelines, based on random clinical trials, 1
Clinical trials, random, as basis for clinical practice guidelines, 1
Colonic bacteria, *in vitro* fermentation of high-amylose cornstarch, 290
Complex diet, vs. elemental diet, polyamine metabolism in rat isolated enterocytes and, 259
Cornstarch, high-amylose, *in vitro* fermentation of by colonic bacteria, 290
Crohn's disease, in adolescents, low- and high-fat peptide-based diets in, 304 (letter)

Deoxycholate, increased *in vivo* crypt surface hyperproliferation and, 177 (erratum)
Diamine oxidase, polyamine metabolism in rat isolated enterocytes and, 259
Diarrhea, small-peptide vs. whole-protein enteral nutrition and, 162
Diet
 elemental vs. complex
  L-citrulline production from L-arginine in, 316
  polyamine metabolism in rat isolated enterocytes and, 259
 fish oil/medium-chain triglyceride structured, eicosanoid production from peripheral blood mononuclear cells and, 266
 glutamine-enriched enteral, bacterial clearance in peritonitis and, 208
 low- and high-fat peptide-based, in adolescent Crohn's disease, 304 (letter)
Drug dependence, home TPN outcome and, 336
Dysphagia, acid maltase deficiency and, 46

Eicosanoid production, from peripheral blood mononuclear cells, with fish oil/medium-chain triglyceride structured diet, 266
Elemental diet, vs. complex diet
 L-citrulline production from L-arginine in, 316
 polyamine metabolism in rat isolated enterocytes and, 259
Enteral formulas, glutamine supplementation of, 183 (editorial)
Enteral nutrition. *See also* Nutrition support
 arginine supplementation in, nitric-oxide—producing tumors and, 215
 cessation of, for arbitrary gastric residual volume, 286
 cyclic vs. continuous, with linoleic acids, immune cell fatty acids and, 123
 early postoperative, in upper GI surgery, peripheral protein kinetics and, 202
 feeding tube in
  pH-guided transpyloric small bowel, pediatric bedside placement of, 112
  placement of, pH and pepsin and trypsin concentration in aspirates as predictors of, 279
  prophylactic locking of with pancreatic enzymes, 353
 glutamine supplementation in, 183 (editorial)
  bacterial clearance in peritonitis and, 208
 in mild acute pancreatitis, vs. TPN, 14
 in obstructive jaundice, adverse effects of, 36
 small-peptide vs. whole-protein, effect of on serum proteins and diarrhea, 162
 subcutaneously implanted port for, 238
 tumor necrosis factor and, 7, 305 (letter)
 after upper GI surgery, vs. TPN, 196 (Vars Research Award)
Epidermal growth factor, up-regulation of sodium-glucose cotransport and, with cholera toxin, 185
Errata
 catheter infections in home parenteral nutrition, 117
 table of contents for Sept/Oct issue, 367
  in vivo crypt surface hyperproliferation decreased by butyrate and increased by deoxycholate, 177
Esophagectomy, subcutaneously implanted enteral nutrition port after, 238
Esophagogastric tube feeding. *See also* Enteral nutrition
 in obstructive jaundice, adverse effects of, 36
Extra-carbohydrate supplementation, in hepatic cirrhosis, energy metabolism and, 96

Fatty acid phospholipids, platelet, postoperative, IV fish oil infusion and, 296
Fatty acid profile, in adipose tissue, before and after liver transplant, 302 (abstract)
Fatty acids
 medium- and long-chain, route of absorption of, 275
 phospholipid immune cell, cyclic vs. continuous feeding with linoleic fatty acids and, 123
Fatty acid status, in home parenteral nutrition, 243 (letter)
Feeding tube
 pH-guided transpyloric small bowel, pediatric bedside placement of, 112
 placement of, pH and pepsin and trypsin concentration in aspirates as predictors of, 279
 prophylactic locking of with pancreatic enzymes, 353
Fish oil, IV infusion of, postoperative platelet fatty acid phospholipid composition and function and, 296
Fish oil emulsions, vs. triglyceride hydrolysis of soy oil, 224
Fish oil/medium-chain triglyceride structured diet, eicosanoid production from peripheral blood mononuclear cells and, 266
Fluid, IV, vs. outpatient TPN, after bone marrow transplant, 157
Formula
 enteral
  arginine supplementation of, nitric oxide—producing tumor growth and, 215
  glutamine supplementation of, 183 (editorial)
   bacterial clearance in peritonitis and, 208
  infant, whey predominant vs. whey hydrolysate, plasma amino acid concentrations and, 27
 TPN, triglyceride hydrolysis of soy oil vs. fish oil emulsions in, 224

Gallbladder emptying, stimulation of, by IV lipids, 350
Gastric residual volume, cessation of enteral feeding and, 286
Gastrointestinal surgery, upper tract
 early enteral nutrition after, peripheral protein kinetics and, 202
 enteral nutrition vs. TPN after, 196 (Vars Research Award)
Gastrostomy, percutaneous endoscopic
 low serum albumin in, increased mortality risk and, 53
 survival after, serum albumin and, 53 (editorial), 72
Glucose transporter-4 (GLUT4) protein, alterations of in adipose cells, insulin resistance and, 347
Glutamine
 in bacterial transcytosis and epithelial cell injury, 75
 intestinal immune cells and, 310
Glutamine supplementation, in enteral nutrition, 183 (editorial)
 bacterial clearance in peritonitis and, 208
Gluten-induced enteropathy, acid maltase deficiency in, muscle weakness and dysphagia in, 46
Growth hormone, in hepatic injury, 55
Gut atrophy, in TPN, triglycerides for prevention of, 21
Gut immune cells, glutamine and, 310
Gut mucosal barrier function, in TPN, nucleosides and nucleotide mixture effects on, 104

Hepatic cirrhosis, energy metabolism in, extra-carbohydrate supplementation and, 96
Hepatic injury, insulin-like growth factor 1 and growth hormone and, 55
Hepatic metastasis, medium-chain triglyceride emulsion in hepatic metastasis and, 220
Hepatic protein and amino acid metabolism, during short-term TPN, 330
Hepatic steatosis, in TPN, pentoxifylline and thalidomide in reduction of, 233
Hepatic transplantation, fatty acid profile of adipose tissue before and after, 302 (abstract)
High-amylose cornstarch, *in vitro* fermentation of by colonic bacteria, 290
High-fat peptide-based diet, in adolescent Crohn's disease, 304 (letter)
Home parenteral nutrition
 catheter infections in, 117 (erratum)
 fatty acid status and, 243 (letter)
 outcome in
  in cancer, 339
  opiate and sedative dependence and, 336
Hydration, intravenous, vs. outpatient TPN, after bone marrow transplant, 157
Hyperglycemia, acute, immunologic effects of, in nondiabetic rats, 91
Hyperphosphatemia, in TPN, skin necrosis and, 50
Hypoalbuminemia, as survival predictor
 after cardiovascular surgery, 81
 after percutaneous endoscopic gastrostomy, 53 (editorial), 72
Hypoenergetic nutrition support, in hospitalized obese patients, 366 (abstract)
Hypogonadism, testosterone for, increased fat-free mass and muscle size with, 241 (abstract)

Indirect calorimetry, 30-minute, in prediction of calorie expenditure in ventilated patients, 168
Infant formula, whey predominant vs. whey hydrolysate, plasma amino acid concentrations and, 27
Inflammatory bowel disease, in adolescents, low- and high-fat peptide-based diets in, 304 (letter)
Insulin-like growth factor 1
 effects of on muscle metabolism, 115
 in hepatic injury, 55
 muscle protein metabolism and, in burn injury, 245
Insulin-like growth factor 1 transgenic mice, enhanced growth of small bowel in, 175
Insulin resistance, GLUT4 alterations in adipose cells and, 347
Intestinal bacteria, in nutrient metabolism, 357
Intestinal cathepsins, as markers of mucosal barrier function, 104
Intestinal immune cells, glutamine and, 310
Intestinal membrane lipids, effects of TPN solution lipids in, 63
Intestine. *See under* Colonic; Small intestine
Intravenous hydration, vs. outpatient TPN, after bone marrow transplant, 157

Jaundice, obstructive, tube feeding in, adverse effects of, 36
Journal of Parenteral and Enteral Nutrition, joint venture with *Clinical Nutrition*, 309 (editorial), 357

Karnofsky performance status, home TPN outcome and, 339

Laparoscopic surgery, short-term TPN in, liver protein and amino acid metabolism in, 330
Linoleic fatty acids, cyclic vs. continuous feeding with, immune cell fatty acids and, 123
Lipids
 IV infusion of, stimulation of gallbladder emptying by, 350
 in TPN solutions, effects of on intestinal membrane lipids, 63
Liver protein and amino acid metabolism, during short-term TPN, 330
Liver transplantation, fatty acid profile of adipose tissue before and after, 302 (abstract)
Long-chain fatty acids, route of absorption of, 275
Long-chain triglyceride emulsions, bone marrow toxicity of, vs. medium-chain emulsion, 343
Low-fat peptide-based diet, in adolescent Crohn's disease, 304 (letter)

Malassezia furfur, central line skin site colonization by, 230
Manganese deposition, in TPN, neurologic disorders and, 41
Mechanical ventilation, energy expenditure in, 30-minute indirect calorimetry in prediction of, 168
Medium-chain fatty acids, route of absorption of, 275
Medium-chain triglyceride emulsion
 bone marrow toxicity of, vs. long-chain emulsion, 343
 in TPN
  eicosanoid production from peripheral blood mononuclear cells and, 266
  hepatic metastasis and, 220
Metastasis, hepatic, medium-chain triglyceride emulsion in hepatic metastasis and, 220
Modular nutrients, in pediatrics, 118 (letter)
Mucosal barrier function, in TPN, nucleoside and nucleotide mixture effects on, 104
Muscle, increased fat-free mass and size of, with testosterone replacement in hypogonadism, 241 (abstract)
Muscle metabolism
 in burn injury, insulin-like growth factor 1 and, 245
 insulin-like growth factor 1 and, 115
Muscle weakness, acid maltase deficiency and, 46

Narcotic dependence, home TPN outcome and, 336
Neonates. *See also* Children
  parenteral nutrition—associated cholestasis in, cholecystokinin prophylaxis for, 100
Neurological disorders, in TPN, manganese deposition and, 41
Nitrogen loss, accelerated in posttraumatic catabolic illness, failure of energy balance to attenuate, 324
Nucleosides and nucleotide mixture, in TPN formula, gut mucosal barrier function and, 104
Nutrient metabolism, intestinal bacteria in, 357
Nutritional science, collaborative, 309 (editorial)
Nutrition support. *See also* Enteral nutrition; Total parenteral nutrition
  hypoenergetic, in hospitalized obese patients, 366 (abstract)
  at scientific frontier, 252 (Presidential address)
Nutrition Support in Clinical Practice, data review and research recommendations, 133

Obesity
  hypoenergetic nutrition support in, 366 (abstract)
  research in, 192 (Rhoads Lecture)
Obstructive jaundice, tube feeding in, adverse effects of, 36
Opiate dependence, home TPN outcome and, 336
Ornithine decarboxylase, polyamine metabolism in rat isolated enterocytes and, 259
Outpatient parenteral nutrition. *See also* Home parenteral nutrition
  vs. IV hydration, after bone marrow transplant, 157
Ovarian vein, long-term central venous access through, 235

Pancreatic enzymes, prophylactic feeding tube locking with, 353
Parenteral nutrition. *See also* Nutrition support; Total parenteral nutrition (TPN)
  outpatient, vs. IV hydration, after bone marrow transplant, 157
  by peripheral route, 117 (letter)
Pediatrics. *See under* Children; Infant; Neonates
Pentoxifylline, in reduction of hepatic steatosis, in TPN, 233
Pepsin, in feeding tube aspirate, as placement predictor, 279
Percutaneous endoscopic gastrostomy
  low serum albumin in, increased mortality risk and, 53
  survival after, serum albumin and, 53 (editorial), 72
Peripheral parenteral nutrition, 117 (letter)
Peripheral protein kinetics, early postoperative enteral nutrition and, in upper GI surgery, 202
Peritonitis, bacterial clearance in, glutamine-enriched enteral diet and, 208
Peyer's patches, uptake of latex beads by, in TPN, 31
pH, in feeding tube aspirate, as placement predictor, 279
pH-guided transpyloric small bowel feeding tube, pediatric bedside placement of, 112
Phospholipid fatty acids, immune cell, cyclic vs. continuous feeding with linoleic fatty acids and, 123
Plasma amino acid concentrations, in infants fed whey predominant vs. whey hydrolysate formula, 27
Platelet fatty acid phospholipid composition and function, postoperative, IV fish oil infusion and, 296
Polyamine metabolism, in rat isolated enterocytes, with elemental vs. complex diet, 259
Port, subcutaneously implanted, for enteral nutrition, 238
Posttraumatic catabolic illness, accelerated nitrogen loss in, failure of energy balance to attenuate, 324
Prostaglandin release, postoperative, in cancer patients, fish oil structured lipid-based diet and, 266
Protein metabolism
  hepatic, during short-term TPN, 330
  insulin-like growth factor 1 and, 115
Proteins, serum, small-peptide vs. whole-protein enteral nutrition and, 162

Random clinical trials, as basis for clinical practice guidelines, 1
Rhoads Lecture, obesity research, 192

Sedative dependence, home TPN outcome and, 336
Serum albumin, as survival predictor
  after cardiovascular surgery, 81
  after percutaneous endoscopic gastrostomy, 53 (editorial), 72
Serum proteins, small-peptide vs. whole-protein enteral nutrition and, 162
Skin necrosis, hyperphosphatemia and, in TPN, 50
Skin-site colonization, by *Malassezia furfur*, 230
Small intestine, enhanced growth of, in insulin-like growth factor 1 transgenic mice, 175
Small-peptide enteral feedings, vs. whole-protein feedings, effect of on serum proteins and diarrhea, 162
Sodium-glucose cotransport, epidermal growth factor up-regulation of, with cholera toxin, 185
Sprue, acid maltase deficiency in, muscle weakness and dysphagia in, 46
Steatosis, hepatic, in TPN, pentoxifylline and thalidomide in reduction of, 233

Testosterone, for hypogonadism, increased fat-free mass and muscle size with, 241 (abstract)
Thalidomide, in reduction of hepatic steatosis, in TPN, 233
Total parenteral nutrition (TPN). *See also* Nutrition support
  cholestasis and, cholecystokinin prophylaxis for, 100
  glutamine supplementation in, intestinal immune cells and, 310
  gut mucosal barrier function in, nucleosides and nucleotide mixture effects on, 104
  hepatic steatosis in, pentoxifylline and thalidomide in reduction of, 233
  home-administered
    in cancer, 339
    catheter infections in, 117 (erratum)
    fatty acid status and, 243 (letter)
    opiate and sedative dependence and, 336
  hyperphosphatemia in, skin necrosis and, 50
  manganese deposition in, neurologic disorders and, 41
  medium-chain triglyceride emulsion in, hepatic metastasis and, 220
  in mild acute pancreatitis, vs. enteral nutrition, 14
  outpatient, vs. IV hydration, after bone marrow transplant, 157
  by peripheral route, 117 (letter)
  short-term, liver protein and amino acid metabolism in, 330
  solutions for, lipids in, effects of on intestinal membrane lipids, 63
  triglyceride hydrolysis of soy oil vs. fish oil emulsions in, 224
  triglycerides in, for gut atrophy prophylaxis, 21
  tumor necrosis factor and, 7, 305 (letter)
  uptake of latex beads by Peyer's patches in, 31
Transplant
  bone marrow, outpatient TPN vs. IV hydration after, 157
  liver, fatty acid profile of adipose tissue before and after, 302 (abstract)
Trauma patients
  accelerated nitrogen loss in, failure of energy balance to attenuate, 324
  muscle protein metabolism in, insulin-like growth factor 1 and, 245
Triglyceride emulsion, medium-chain
  bone marrow toxicity of, vs. long-chain emulsion, 343
  eicosanoid production from peripheral blood mononuclear cells and, 266
  hepatic metastasis and, 220
Triglyceride hydrolysis of soy oil, vs. fish oil emulsions, 224
Triglycerides, in TPN, for gut atrophy prophylaxis, 21
Trypsin, in feeding tube aspirate, as placement predictor, 279
Tube feeding. *See* Enteral nutrition; Feeding tube
Tumor necrosis factor, GI, hepatic and metabolic effects of, with enteral vs. total parenteral nutrition, 7, 305 (letter)

Upper gastrointestinal surgery
  early enteral nutrition after, peripheral protein kinetics and, 202
  enteral nutrition vs. TPN after, 196 (Vars Research Award)

Vars Research Award, enteral nutrition vs. TPN after upper GI surgery, 196
Ventilated patients, energy expenditure in, 30-minute indirect calorimetry in prediction of, 168

Weakness, acid maltase deficiency and, 46
Whey predominant formula, vs. whey hydrolysate formula, plasma amino acid concentration and, in infants, 27
Whole-peptide enteral feedings, vs. small-peptide feedings, effect of on serum proteins and diarrhea, 162
